## BEFORE & AFTERS

This kitchen belongs to an elderly couple. The wife's medical issues including hip replacement and various leg pains has led to difficulty reaching items in lower cabinets. We installed pull-out shelving systems to ease the access to heavier items, and after purging items that hadn't been used in years, the lighter items became much easier to store. Now when she makes a holiday meal for the whole family, it doesn't seem as big of a chore.
